| ABSTRACT | The project ''digital inclusion'' focusses on developing solutions to make citizens of Vejle 'smart citizens' and part of the digital society. This includes elderly people, vulnerable people, immigrants, small businesses and young people, who struggle with the mandatory self-service on public services. The goals are:
- That all people are ensured digital skills and are prepared to be active citizens in the future Vejle Kommune
- That the digital development does not cause social imbalance
- That digital media will enhance every ones place in the community, for example active participation and increased language skills |
